

Distribution of medications to patients in any hospital is a substernal part of the daily routine of any ward. By designing a dedicated cart that answers the needs of the medical staff, the medication distribution process can be enhanced without jeopardizing patient safety

With a simple add on accessory the Apollo 109cm (43") can be equipped with All in One computer or with a dedicated double joints laptop ergonomic arm

MEDICATION CASSETTE

The cart is equipped with light-weight ergonomic removable medication cassette, mounted on a set of full-length retracting telescopic slides

The cassette can be equipped with 12 to 18 dividable medication bins. Each bin can be labeled and equipped with a label cover, so no need for sticky labels
